Fancy Poultry Terms

ANSWER KEY:

8-11 Year Olds= Match the term with the correct definition. (1 pt. each)

CLASS

In poultry this is determined by the place of origin of the bird.

BREED

This classifies birds within a class by body shape and size.

VARIETY

This is the subdivision of breed and is based on feather color and kind of comb or both.

BANTAMS

Miniature versions of large breeds of poultry.

AOSB

This stands for All Other Standard Breeds, a group in which birds are placed under the Standard of Perfection.

* Showmanship Techniques ANSWER KEY

8-11 Year Olds= Place the correct technique for each of the Procedures listed. (EXAMPLE: Procedure= Hand the bird to the judge. Technique= Head first.

1. Remove bird from exhibition coop= Always head first with one hand over the back, the other under the body with fingers around legs.
2. Hold the bird= Pick up the bird by spreading your fingers and placing your hand palm up under the bird's breast as it faces you. As your palm touches the breasts, you will find the bird's legs will be between your fingers. As you lift the bird, gently grasp the legs by closing the fingers. You can now lift the bird without having it squirm and fight.
3. Examine the head= Hold head of bird alert by prodding at the region of the wattles.
4. Examine wings= Open either wing with free hand. To open the other wing, merely pass hand, palm up, over to that side. Grasp wing bow and fan out wing. (There is no need to transfer bird to other hand)
5. Examine plumage= Over back, on breast and body.
6. Examine tail plumage= Give the tail piece a quick flip up and down.
7. Examine shanks and feet= Place free hand on back of bird. Turn bird upside down. Back of bird should rest in the palm of the hand.
8. Examine body= Hold as in #7.
9. Hand bird to judge= Head first.
10. Return bird to coop= Head first.
11. Return to position by coop= Keep your bird on the alert until judge has made a decision.

8-11 year olds

Label the 7 parts of the

Medication Label

Answer Key

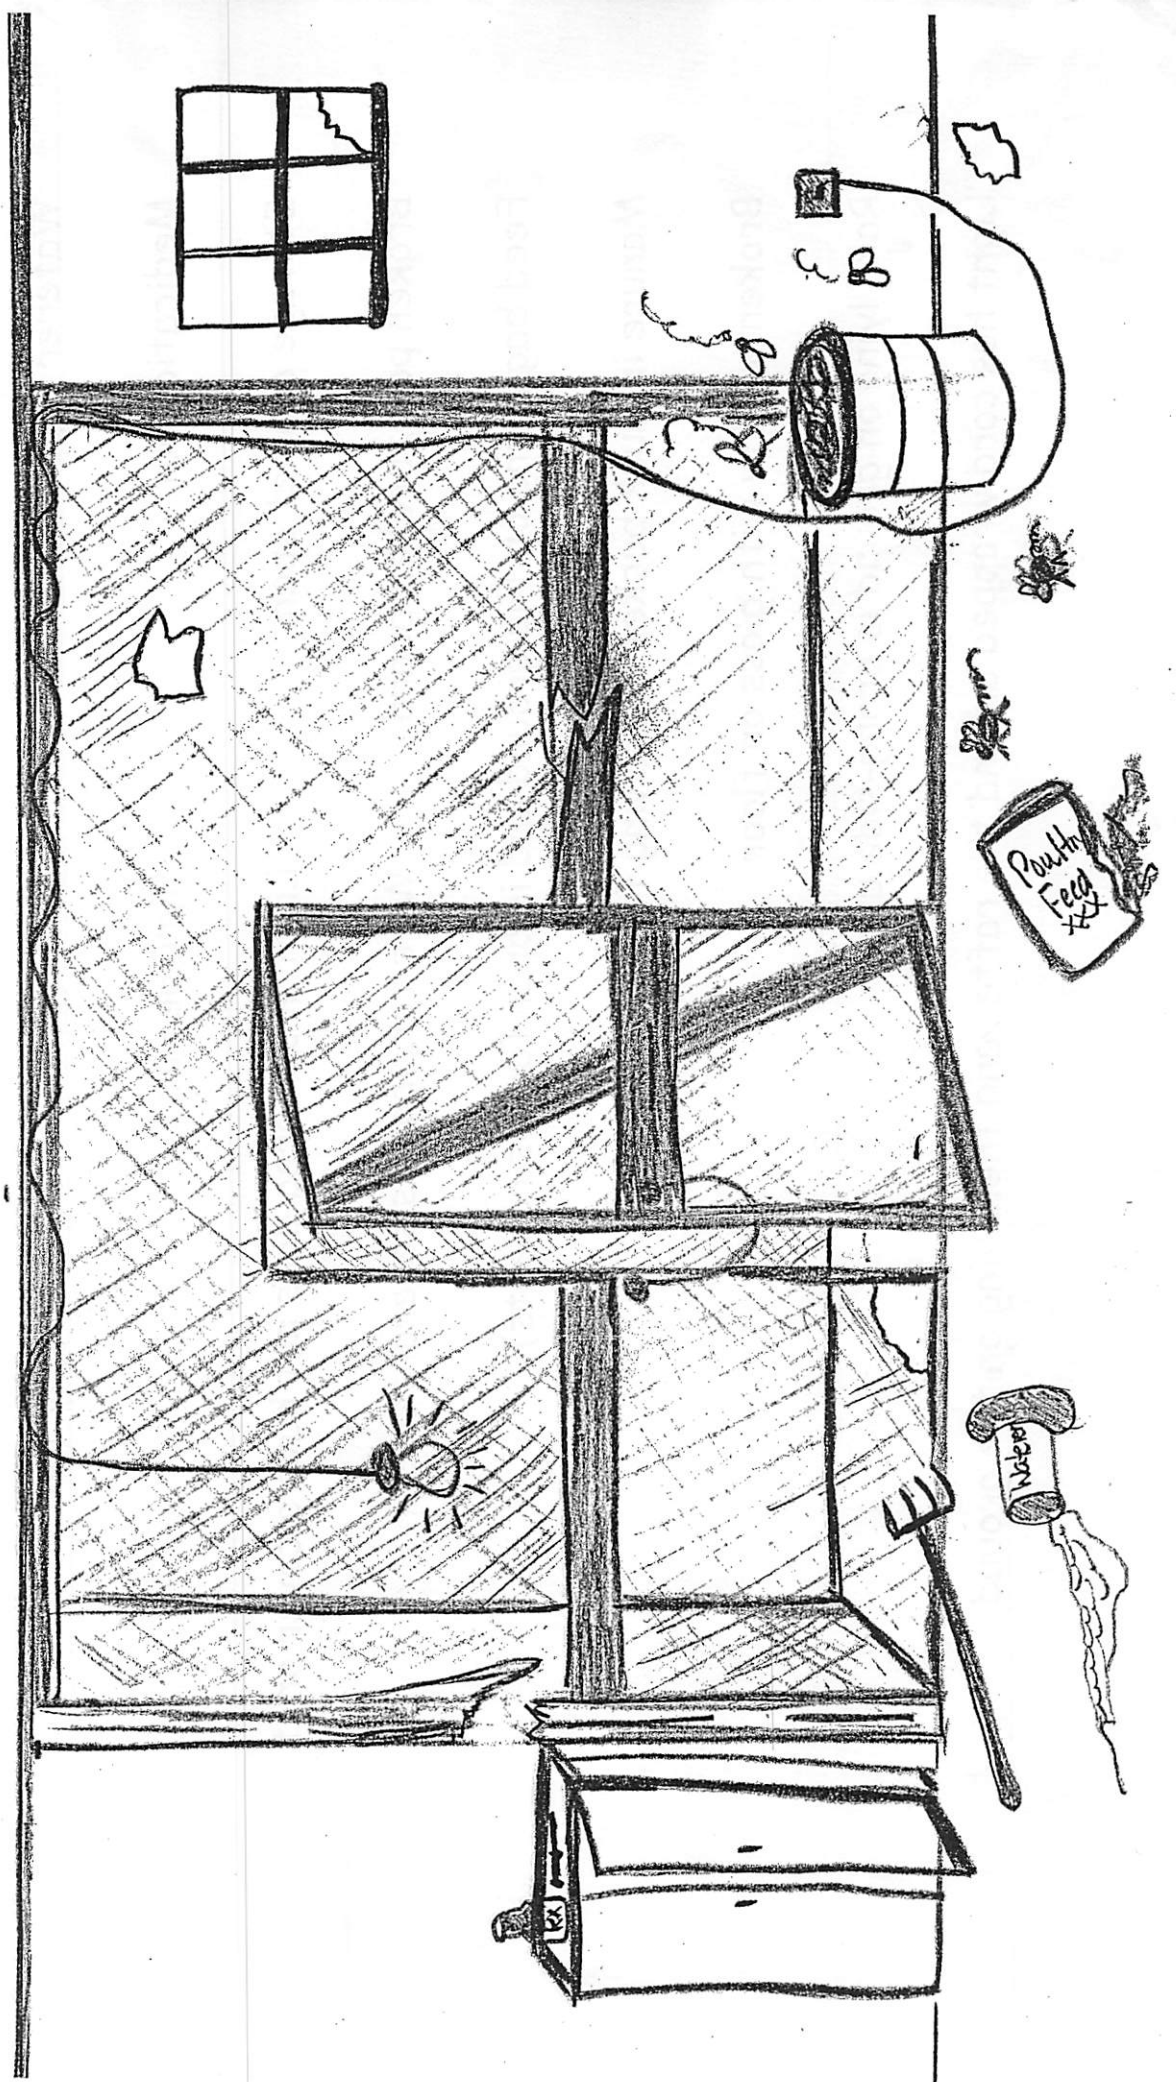

<i>Name of Drug</i>	OMNIBIOTIC
	(hydrocillin)
	<i>Active Ingredients</i>
	Directions for use: See package insert
<i>Cautions and Warnings</i>	Warning: The use of this drug must be discontinued for 30 days before treated animals are slaughtered for food. Exceeding the highest recommended dosage level may result in antibiotic residues in meat or milk beyond the withdrawal time.
	<i>Withholding Times</i>
	Store between 2° and 8° C (36° and 46° F)
	Keep dry and away from light
<i>Quantity of Contents</i>	Net Contents: 100 ml

Sanitation Problem: 8-11 Year Olds - Can you find the problems?

Sanitation

ANSWER KEY

8-11 Year Olds= Identify 6 sanitation problems and tell what you would do to correct them. (1 pt. each)

Waterer tipped over

Door open with rope loosely tied

Medication out

Syringe out

Storage cabinet open

Light in pen area does not have a cover on it

Broken post; broken board

Wire fencing has several tears in it

Feed bag laying on the ground and is open (draws rodents)

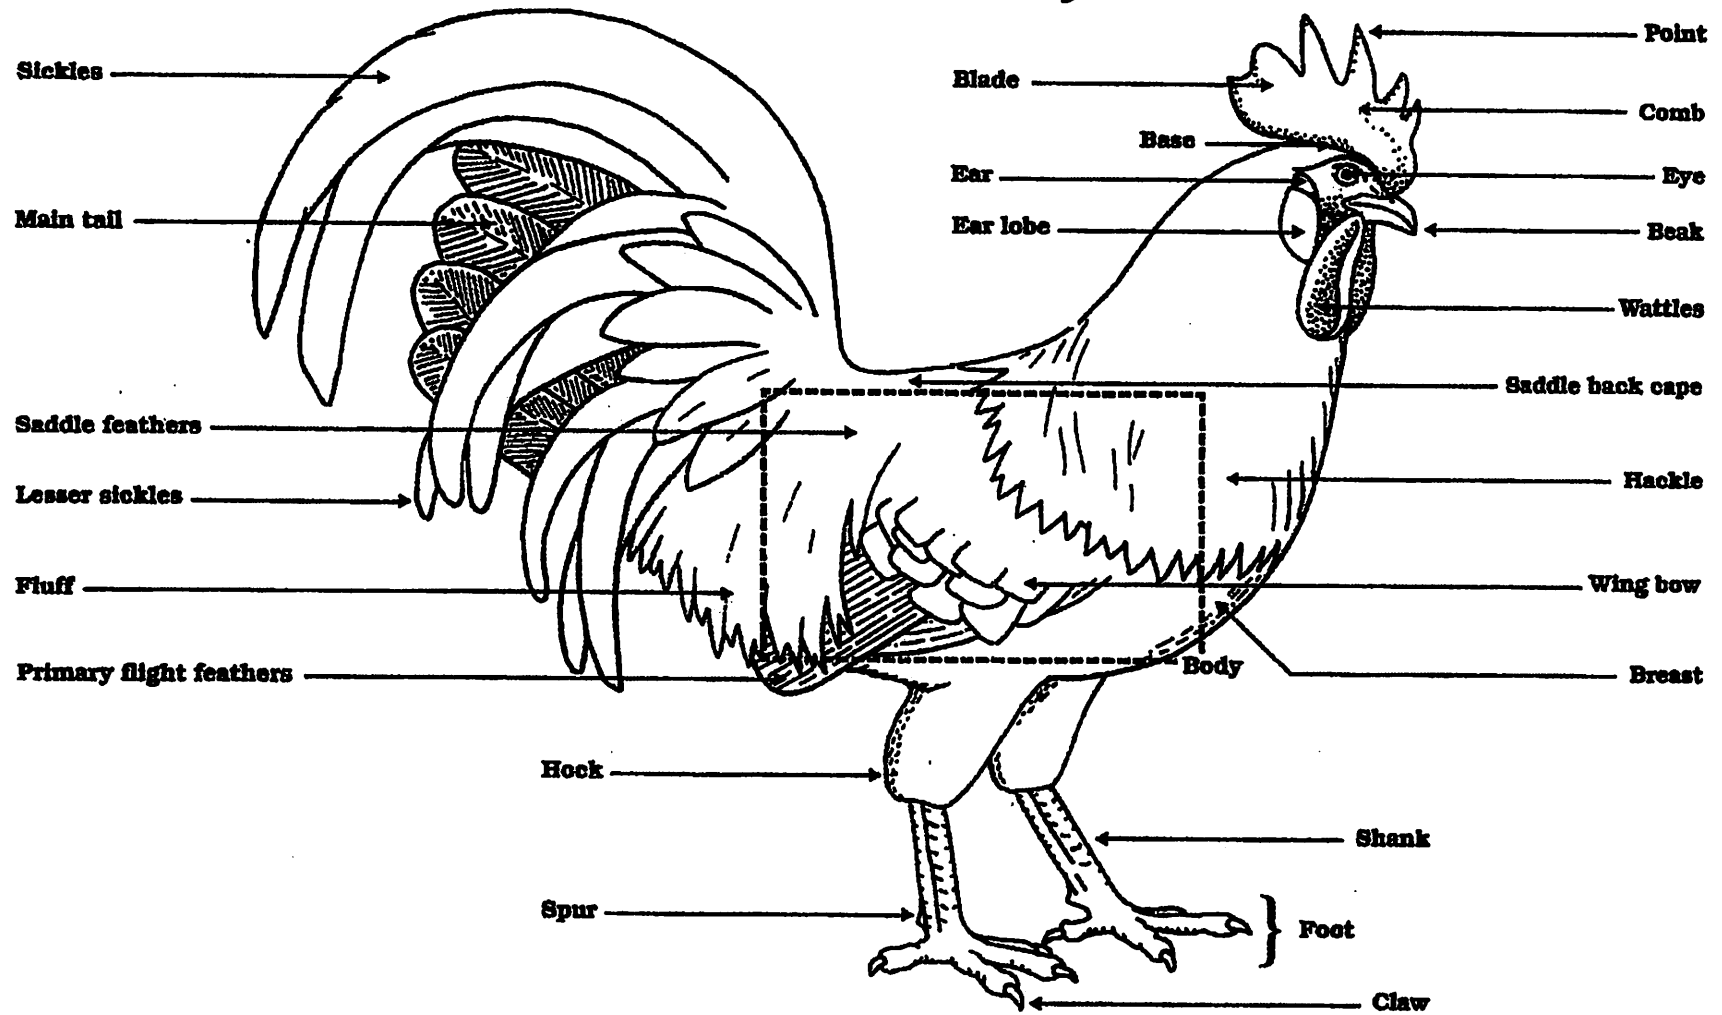

Manure in muck bucket is drawing flies

Broken window with glass on floor

Rake lying on ground is prong-side up

Light has cord wrapped around the rafter and then lying on the ground

Parts of a Chicken (Cockerel)

Standard Male Combs

ANSWER KEY

12-14 Year Olds= Label the 6 combs with the correct name label. (1 pt. each)

Single Comb

Rose Comb

Pea Comb

Cushion Comb

Buttercup Comb

Strawberry Comb

Parts of the Sultans Head

12-14 Year Olds= Label the 4 parts of the Sultans Head (1 pt. each)

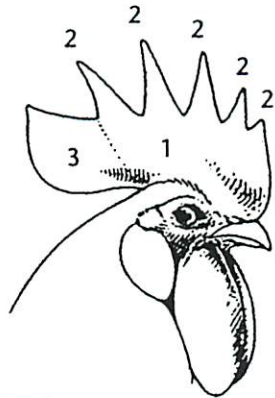

1. V-shaped combs

2. Crest

3. Muff

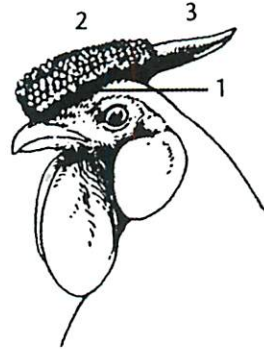

4. Beard

Different Types of Standard Male Combs

Single Comb

1. Base 2. Point 3. Blade

Rose Comb

1. Base 2. Rounded Points 3. Spike

Pea Comb

Sultans Head, Male (Ideal)

1. V-shaped Combs
2. Crest 3. Muff 4. Beard

Cushion Comb (Ideal)

Buttercup Comb (Ideal)

Strawberry Comb (Ideal)

Internal/External Parasites & Diseases

ANSWER KEY

12-14 Year Olds= Label the 4 internal/external parasites and diseases. (2 pts. each)

*Round worms= Most common internal parasite in poultry. More of a problem in flocks that run outside and can best be treated with special medication added to their feed or water.

*Lice = An external parasite, it can be kept in check with normal poultry management. Severe infestations may require treatment with an approved insecticide.

*Pullorum= A bacterial disease that is passed by the hen to her chick through the egg. There is no cure for this disease.

*Coccidiosis= Disease in growing birds. Affected birds huddle, look pale and ruffled and may have \ diarrhea with bloody droppings.

Light As a Feather

Life Skill: Making decisions
Poultry Project Skill: Identifying feather patterns and features
Success Indicator: Matches pattern of feathers and completes the word find.

Do you know the difference between a penciled and a laced pattern? Mottled and barred? Feathers come in many different colors and have a variety of patterns. These patterns are often very

different between various breeds and varieties of birds. In this activity, you'll have fun learning about feather patterns and the ways feathers are important to birds as you develop your decision-making skills.

Crack the Case

Match the pattern name with the feather pattern and list the feather patterns of the birds you raise. Then find the 23 words in the Feather Feature Word Find and explain each word to your helper. As a bonus collect as many of the patterns as you can find and tape these over the drawings!

The fowl grows three sets of feathers before it becomes an adult. In some color patterns each feather significantly differs from the previous feather.

- Feather Patterns**
- Penciled
 - Spangled
 - Mottled
 - Laced
 - Barred
 - Speckled

1. 
 Pattern Spangled

2. 
 Pattern Speckled

3. 
 Pattern Laced

4. 
 Pattern Barred

5. 
 Pattern Mottled

6. 
 Pattern Penciled

In the breeds that you raise, what are their feather patterns?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
